

Join Our Research Study!

Interested in how AI could impact healthcare? If you're a member of a 2SLGBTQIA+ community, we want to hear your thoughts to help improve research and health equity!

Co-designing a "Fairness Dashboard" for Clinical Applications of Artificial Intelligence in Mental Health

Purpose of the Study:

We aim to understand how, or if, underrepresented groups want to be part of and seen in a digital tool created to ensure fairness in using AI for mental healthcare.

Study Details:

- You will be introduced to the emerging role of AI in health care;
- You will be asked to share your thoughts and feelings about data visualization of sociodemographic data in a small group discussion;
- You will be compensated with an honorarium for your participation.

Eligibility

1. A person with lived experience of a mental illness
2. A person who has experienced systemic or interpersonal forms of discrimination, such as those based on sexual orientation, gender identity, or gender expression.

Inclusive of people with diverse lived-experiences, including those who use drugs, people experiencing housing instability, and newcomers to Canada.
